Thin Solid Films 275 (1996) 273–277

thin solid films

Subject Index of Volume 275

Alloys
structure of laser-deposited metallic alloys and multilayers, 18
giant magnetoresistance and microstructure in Cr–Fe and Cu–Co heterogeneous alloys, 106
the influence of the argon pressure and substrate temperature on the structure of r.f.-sputtered CrNi(65:35), CrNi(50:50) and CrNi(20:80) thin films, 152
synthesis of amorphous Zr–Cu alloys by magnetron co-sputtering, 164
perpendicular magnetic anisotropy in Co_xPt_{1-x} alloy films, 224
non-equilibrium phase formation in ion-bombarded alloys, 235
surface topography of amorphous $Zr_{65.0}Al_{7.5}Cu_{27.5}$ alloy films around the glass transition—an in-situ UHV-STM study, 240
role of point defects on the optical properties of Pd-based Hume–Rothery alloys, 254
epitaxial fcc Fe–Co alloy films on Cu(001), 262
Aluminium
investigation on metallurgical properties and electromigration in AlCu metallizations for VLSI applications, 159
Amorphous materials
multilayers—a way to prepare metastable phases by multiple interface reactions, 73
the influence of composition on the crystallisation kinetics of relaxed SbGe films, 78
influence of deposition conditions and ion irradiation on thin films of amorphous Cu–Zr superconductors, 82
synthesis of amorphous Zr–Cu alloys by magnetron co-sputtering, 164
thickness- and concentration-dependent crystal-to-amorphous transition of $Fe_{100-x}Zr_x$ in $Zr/Fe_{100-x}Zr_x/Zr$ trilayers, 176
iron silicide formation on hydrogenated amorphous silicon, 191
surface topography of amorphous $Zr_{65.0}Al_{7.5}Cu_{27.5}$ alloy films around the glass transition—an in-situ UHV-STM study, 240
Anisotropy
thickness-dependent in-plane magnetic anisotropy in epitaxial Fe films on GaAs substrates, 91
perpendicular magnetic anisotropy in Co_xPt_{1-x} alloy films, 224
Mössbauer characterization of FeN thin films prepared by reactive evaporation, 251
Annealing
in-situ spectroscopic ellipsometry for monitoring the Ti–Si multilayers during growth and annealing, 44
growth, morphology and annealing of thin Co layers on Au/mica, 58
the influence of composition on the crystallisation kinetics of relaxed SbGe films, 78
Antimony
conductivity of thin antimony films at low temperatures, 125
Argon
the influence of the ion flux density on the properties of molybdenum films deposited from the vapour phase under simultaneous argon ion irradiation, 54
Atomic force microscopy
first stages of platinum electroless deposition on silicon(100) from hydrogen fluoride solutions studied by AFM, 12
CdHgTe
diffusion of charged impurities in graded-gap HgTe/CdTe superlattices, 228
Chromium
bilinear and biquadratic exchange coupling in epitaxial Fe/Cr/Fe/Ag/GaAs(100) structures, 199
Coatings
elaboration and characterization of Ti and TiN thin films and Ti/TiN multilayers for hard coating applications, 213
Cobalt
growth, morphology and annealing of thin Co layers on Au/mica, 58
irreversibility in giant magnetoresistance and its relation to magnetic substructure, 111
structure and oscillatory magnetoresistance of Co(hcp)/Cu sandwiches, 115
the giant magnetoresistance and magnetisation of sputter deposited Co/Cu multilayers, 195
crystallographic and magnetic investigations of the cobalt columns electrodeposited in the pores of anodic alumina, 207
perpendicular magnetic anisotropy in Co_xPt_{1-x} alloy films, 224
Computer simulation
Monte Carlo simulation of non-specular X-ray scattering profiles from multilayered structures, 184
Conductivity
conductivity of thin antimony films at low temperatures, 125
Copper
residual stresses influence on the structural evolution of Cu–Mo solid solutions studied by X-ray diffraction, 25
irreversibility in giant magnetoresistance and its relation to magnetic substructure, 111
structure and oscillatory magnetoresistance of Co(hcp)/Cu sandwiches, 115
investigation on metallurgical properties and electromigration in AlCu metallizations for VLSI applications, 159
the giant magnetoresistance and magnetisation of sputter deposited Co/Cu multilayers, 195
Crystallization
study on the crystallization of nickel films prepared by the ion beam and vapour deposition method, 61
the influence of composition on the crystallisation kinetics of relaxed SbGe films, 78
Deposition process
first stages of platinum electroless deposition on silicon(100) from hydrogen fluoride solutions studied by AFM, 12
structure of laser-deposited metallic alloys and multilayers, 18
the influence of the ion flux density on the properties of molybdenum films deposited from the vapour phase under simultaneous argon ion irradiation, 54
study on the crystallization of nickel films prepared by the ion beam and vapour deposition method, 61

Elsevier Science S.A.

influence of deposition conditions and ion irradiation on thin films of amorphous Cu–Zr superconductors, 82
iron silicide formation on hydrogenated amorphous silicon, 191
crystallographic and magnetic investigations of the cobalt columns electrodeposited in the pores of anodic alumina, 207
electrodeposition of metallic multilayers with modulated electric regimes, 216
Diffusion
segregation effect on grain-boundary diffusion in thin metallic films, 144
diffusion of charged impurities in graded-gap HgTe/CdTe superlattices, 228
effects of short-range ordering on interdiffusion in Ag/Au epitaxial multilayers, 258

Electrical properties and measurements
magnetic and electrical characterizations of thin Ni–Fe and Ni–Fe–Mo films, 231
Electrochemistry
crystallographic and magnetic investigations of the cobalt columns electrodeposited in the pores of anodic alumina, 207
Electromigration
investigation on metallurgical properties and electromigration in AlCu metallizations for VLSI applications, 159
Electron microscopy
the influence of the argon pressure and substrate temperature on the structure of r.f.-sputtered CrNi(65:35), CrNi(50:50) and CrNi(20:80) thin films, 152
Ellipsometry
in-situ spectroscopic ellipsometry for monitoring the Ti–Si multilayers during growth and annealing, 44
Epitaxy
thickness-dependent in-plane magnetic anisotropy in epitaxial Fe films on GaAs substrates, 91
microstructural studies and magneto-optic properties of Co/Au multilayers epitaxially grown on MoS_2 substrates, 129
perpendicular magnetic anisotropy in epitaxial Cu/Ni/Cu/Si (001), 155
domain splitting in epitaxial Fe/GaAs(001) films during hard axis reversal, 172
epitaxially grown Ag(001)/Fe(001) superlattices, 180
bilinear and biquadratic exchange coupling in epitaxial Fe/Cr/Fe/Ag/GaAs(100) structures, 199
epitaxial fcc Fe–Co alloy films on Cu(001), 262
Evaporation
study of the mechanical and microstructural state of platinum thin films, 22
conductivity of thin antimony films at low temperatures, 125
crystallographic and electronic structure of Cu/Cr/Cu(001) sandwiches, 133
Mössbauer characterization of FeN thin films prepared by reactive evaporation, 251

Fine particle system
magnetization and magnetoresistance in granular AgCo films, 220

Gallium arsenide
thickness-dependent in-plane magnetic anisotropy in epitaxial Fe films on GaAs substrates, 91
Gold
microstructure and residual stresses in (111) Au/Ni multilayers, 29
profile analysis of thin film X-ray diffraction peaks, 40
effect of ion irradiation on the structure of Au/Ni multilayers, 247
effects of short-range ordering on interdiffusion in Ag/Au epitaxial multilayers, 258

Graded-gap semiconductor
diffusion of charged impurities in graded-gap HgTe/CdTe superlattices, 228
Grain boundary
segregation effect on grain-boundary diffusion in thin metallic films, 144
Growth mechanism
in-situ spectroscopic ellipsometry for monitoring the Ti–Si multilayers during growth and annealing, 44
growth, morphology and annealing of thin Co layers on Au/mica, 58
erbium silicide films on (100) silicon, grown in high vacuum. Fabrication and properties, 87
comparison of magnetism and morphology of ultrathin Fe films on Cu(100) and Cu_3Au(100), 99
MBE growth and characterisation of light rare-earth superlattices, 137
the influence of the argon pressure and substrate temperature on the structure of r.f.-sputtered CrNi(65:35), CrNi(50:50) and CrNi(20:80) thin films, 152
epitaxially grown Ag(001)/Fe(001) superlattices, 180

Hydrogen
metallic multilayers and hydrogen, 48

Indium
PAC and CEMS study of ion-irradiated Ag/Fe and In/Fe layers, 69
Insulators
metal–insulator transition and giant magnetoresistance in $La_{1-x}MnO_{3-\delta}$ thin films and superlattices, 244
Interfaces
multilayers—a way to prepare metastable phases by multiple interface reactions, 73
influence of interface roughness and quantum size effect on the giant magnetoresistance in magnetic layered structures, 148
Monte Carlo simulation of non-specular X-ray scattering profiles from multilayered structures, 184
non-equilibrium phase formation in ion-bombarded alloys, 235
Ion bombardment
the influence of the ion flux density on the properties of molybdenum films deposited from the vapour phase under simultaneous argon ion irradiation, 54
study on the crystallization of nickel films prepared by the ion beam and vapour deposition method, 61
influence of deposition conditions and ion irradiation on thin films of amorphous Cu–Zr superconductors, 82
non-equilibrium phase formation in ion-bombarded alloys, 235
Iron
conversion electron Mössbauer spectroscopy study of iron disilicide films grown by MBE, 8
PAC and CEMS study of ion-irradiated Ag/Fe and In/Fe layers, 69
thickness-dependent in-plane magnetic anisotropy in epitaxial Fe films on GaAs substrates, 91
magnetic circular dichroism of Fe/Pd(100) ultrathin films, 95
thickness- and concentration-dependent crystal-to-amorphous transition of $Fe_{100-x}Zr_x$ in $Zr/Fe_{100-x}Zr_x/Zr$ trilayers, 176
iron silicide formation on hydrogenated amorphous silicon, 191
Iron nitride
Mössbauer characterization of FeN thin films prepared by reactive evaporation, 251

Laser irradiation
the influence of composition on the crystallisation kinetics of relaxed SbGe films, 78
Light scattering
bilinear and biquadratic exchange coupling in epitaxial Fe/Cr/Fe/Ag/GaAs(100) structures, 199

Magnetic properties and measurements
relation between structural and physical properties in magnetic and superconducting superlattices, 1
structure, magnetism and thermal stability of Fe–Al_2O_3 multilayers, 64
magnetic circular dichroism of Fe/Pd(100) ultrathin films, 95
comparison of magnetism and morphology of ultrathin Fe films on Cu(100) and Cu_3Au(100), 99
giant magnetoresistance and microstructure in Cr–Fe and Cu–Co heterogeneous alloys, 106
structure and oscillatory magnetoresistance of Co(hcp)/Cu sandwiches, 115
magnetic flux pinning and microstructure, a special case: *a*-axis oriented $EuBa_2Cu_3O_7/PrBa_2Cu_3O_7$ superconducting superlattices, 119
conductivity of thin antimony films at low temperatures, 125
microstructural studies and magneto-optic properties of Co/Au multilayers epitaxially grown on MoS_2 substrates, 129
influence of interface roughness and quantum size effect on the giant magnetoresistance in magnetic layered structures, 148
perpendicular magnetic anisotropy in epitaxial Cu/Ni/Cu/Si (001), 155
synthesis of amorphous Zr–Cu alloys by magnetron co-sputtering, 164
domain splitting in epitaxial Fe/GaAs(001) films during hard axis reversal, 172
the giant magnetoresistance and magnetisation of sputter deposited Co/Cu multilayers, 195
bilinear and biquadratic exchange coupling in epitaxial Fe/Cr/Fe/Ag/GaAs(100) structures, 199
crystallographic and magnetic investigations of the cobalt columns electrodeposited in the pores of anodic alumina, 207
study of structural imperfections in sputtered Co/Cu multilayers, 210
electrodeposition of metallic multilayers with modulated electric regimes, 216
magnetization and magnetoresistance in granular AgCo films, 220
magnetic and electrical characterizations of thin Ni–Fe and Ni–Fe–Mo films, 231
metal–insulator transition and giant magnetoresistance in $La_{1-x}MnO_{3-\delta}$ thin films and superlattices, 244
epitaxial fcc Fe–Co alloy films on Cu(001), 262
Magnetic structures
C(2×2) ferrimagnetic order versus P(1×1) ferromagnetic order in V, Cr, Mn monolayers on Fe(001), 103
irreversibility in giant magnetoresistance and its relation to magnetic substructure, 111
Metals
structure of laser-deposited metallic alloys and multilayers, 18
structural characterisation of multilayer films, 35
metallic multilayers and hydrogen, 48
segregation effect on grain-boundary diffusion in thin metallic films, 144
investigation on metallurgical properties and electromigration in AlCu metallizations for VLSI applications, 159
electrodeposition of metallic multilayers with modulated electric regimes, 216
non-equilibrium phase formation in ion-bombarded alloys, 235
surface topography of amorphous $Zr_{65.0}Al_{7.5}Cu_{27.5}$ alloy films around the glass transition—an in-situ UHV-STM study, 240
metal–insulator transition and giant magnetoresistance in $La_{1-x}MnO_{3-\delta}$ thin films and superlattices, 244
surface structure characterization by photoelectron holography, 266
Molecular beam epitaxy
conversion electron Mössbauer spectroscopy study of iron disilicide films grown by MBE, 8
MBE growth and characterisation of light rare-earth superlattices, 137
Molybdenum
residual stresses influence on the structural evolution of Cu–Mo solid solutions studied by X-ray diffraction, 25
the influence of the ion flux density on the properties of molybdenum films deposited from the vapour phase under simultaneous argon ion irradiation, 54
Monolayers
C(2×2) ferrimagnetic order versus P(1×1) ferromagnetic order in V, Cr, Mn monolayers on Fe(001), 103
Mössbauer spectroscopy
conversion electron Mössbauer spectroscopy study of iron disilicide films grown by MBE, 8
Mössbauer characterization of FeN thin films prepared by reactive evaporation, 251
Multilayers
structure of laser-deposited metallic alloys and multilayers, 18
microstructure and residual stresses in (111) Au/Ni multilayers, 29
structural characterisation of multilayer films, 35
in-situ spectroscopic ellipsometry for monitoring the Ti–Si multilayers during growth and annealing, 44
metallic multilayers and hydrogen, 48
structure, magnetism and thermal stability of Fe–Al_2O_3 multilayers, 64
multilayers—a way to prepare metastable phases by multiple interface reactions, 73
irreversibility in giant magnetoresistance and its relation to magnetic substructure, 111
microstructural studies and magneto-optic properties of Co/Au multilayers epitaxially grown on MoS_2 substrates, 129
Monte Carlo simulation of non-specular X-ray scattering profiles from multilayered structures, 184
the giant magnetoresistance and magnetisation of sputter deposited Co/Cu multilayers, 195
texture and phase transformation of sputter-deposited metastable Ta films and Ta/Cu multilayers, 203
study of structural imperfections in sputtered Co/Cu multilayers, 210
elaboration and characterization of Ti and TiN thin films and Ti/TiN multilayers for hard coating applications, 213
electrodeposition of metallic multilayers with modulated electric regimes, 216
effect of ion irradiation on the structure of Au/Ni multilayers, 247
effects of short-range ordering on interdiffusion in Ag/Au epitaxial multilayers, 258

Neutron scattering
metallic multilayers and hydrogen, 48
Nickel
microstructure and residual stresses in (111) Au/Ni multilayers, 29
study on the crystallization of nickel films prepared by the ion beam and vapour deposition method, 61
perpendicular magnetic anisotropy in epitaxial Cu/Ni/Cu/Si (001), 155
effect of ion irradiation on the structure of Au/Ni multilayers, 247
Nuclear magnetic resonance
giant magnetoresistance and microstructure in Cr–Fe and Cu–Co heterogeneous alloys, 106

Optical properties
optical and crystallographic properties of potassium-implanted tungsten, 140
role of point defects on the optical properties of Pd-based Hume–Rothery alloys, 254

Palladium
magnetic circular dichroism of Fe/Pd(100) ultrathin films, 95
Particle growth
magnetization and magnetoresistance in granular AgCo films, 220

Phase transitions
texture and phase transformation of sputter-deposited metastable Ta films and Ta/Cu multilayers, 203
Platinum
first stages of platinum electroless deposition on silicon(100) from hydrogen fluoride solutions studied by AFM, 12
study of the mechanical and microstructural state of platinum thin films, 22
profile analysis of thin film X-ray diffraction peaks, 40
perpendicular magnetic anisotropy in Co_xPt_{1-x} alloy films, 224
Potassium
optical and crystallographic properties of potassium-implanted tungsten, 140
Precipitation
magnetization and magnetoresistance in granular AgCo films, 220

Quantum effects
influence of interface roughness and quantum size effect on the giant magnetoresistance in magnetic layered structures, 148

Resistivity
magnetic and electrical characterizations of thin Ni–Fe and Ni–Fe–Mo films, 231

Segregation
segregation effect on grain-boundary diffusion in thin metallic films, 144
Silicides
conversion electron Mössbauer spectroscopy study of iron disilicide films grown by MBE, 8
Silicon
first stages of platinum electroless deposition on silicon(100) from hydrogen fluoride solutions studied by AFM, 12
erbium silicide films on (100) silicon, grown in high vacuum. Fabrication and properties, 87
iron silicide formation on hydrogenated amorphous silicon, 191
Silver
PAC and CEMS study of ion-irradiated Ag/Fe and In/Fe layers, 69
effects of short-range ordering on interdiffusion in Ag/Au epitaxial multilayers, 258
Sputtering
structure, magnetism and thermal stability of $Fe–Al_2O_3$ multilayers, 64
synthesis of amorphous Zr–Cu alloys by magnetron co-sputtering, 164
the giant magnetoresistance and magnetisation of sputter deposited Co/Cu multilayers, 195
texture and phase transformation of sputter-deposited metastable Ta films and Ta/Cu multilayers, 203
study of structural imperfections in sputtered Co/Cu multilayers, 210
magnetic and electrical characterizations of thin Ni–Fe and Ni–Fe–Mo films, 231
role of point defects on the optical properties of Pd-based Hume–Rothery alloys, 254
Stress
residual stresses influence on the structural evolution of Cu–Mo solid solutions studied by X-ray diffraction, 25
microstructure and residual stresses in (111) Au/Ni multilayers, 29
perpendicular magnetic anisotropy in epitaxial Cu/Ni/Cu/Si (001), 155
influence of microstructure on residual stress in tungsten thin films analyzed by X-ray diffraction, 168
X-ray diffraction study of the sub-structure modification induced by residual stresses during the deposition process of 304L stainless steel films, 188
Structural properties
relation between structural and physical properties in magnetic and superconducting superlattices, 1
study of the mechanical and microstructural state of platinum thin films, 22
residual stresses influence on the structural evolution of Cu–Mo solid solutions studied by X-ray diffraction, 25
structural characterisation of multilayer films, 35
structure, magnetism and thermal stability of $Fe–Al_2O_3$ multilayers, 64
structure and oscillatory magnetoresistance of Co(hcp)/Cu sandwiches, 115
magnetic flux pinning and microstructure, a special case: *a*-axis oriented $EuBa_2Cu_3O_7/PrBa_2Cu_3O_7$ superconducting superlattices, 119
microstructural studies and magneto-optic properties of Co/Au multilayers epitaxially grown on MoS_2 substrates, 129
crystallographic and electronic structure of Cu/Cr/Cu(001) sandwiches, 133
MBE growth and characterisation of light rare-earth superlattices, 137
the influence of the argon pressure and substrate temperature on the structure of r.f.-sputtered CrNi(65:35), CrNi(50:50) and CrNi(20:80) thin films, 152
influence of microstructure on residual stress in tungsten thin films analyzed by X-ray diffraction, 168
thickness- and concentration-dependent crystal-to-amorphous transition of $Fe_{100-x}Zr_x$ in $Zr/Fe_{100-x}Zr_x/Zr$ trilayers, 176
X-ray diffraction study of the sub-structure modification induced by residual stresses during the deposition process of 304L stainless steel films, 188
study of structural imperfections in sputtered Co/Cu multilayers, 210
epitaxial fcc Fe–Co alloy films on Cu(001), 262
Superconductivity
relation between structural and physical properties in magnetic and superconducting superlattices, 1
influence of deposition conditions and ion irradiation on thin films of amorphous Cu–Zr superconductors, 82
magnetic flux pinning and microstructure, a special case: *a*-axis oriented $EuBa_2Cu_3O_7/PrBa_2Cu_3O_7$ superconducting superlattices, 119
Superlattices
relation between structural and physical properties in magnetic and superconducting superlattices, 1
magnetic flux pinning and microstructure, a special case: *a*-axis oriented $EuBa_2Cu_3O_7/PrBa_2Cu_3O_7$ superconducting superlattices, 119
MBE growth and characterisation of light rare-earth superlattices, 137
epitaxially grown Ag(001)/Fe(001) superlattices, 180
diffusion of charged impurities in graded-gap HgTe/CdTe superlattices, 228
metal–insulator transition and giant magnetoresistance in $La_{1-x}MnO_{3-\delta}$ thin films and superlattices, 244
effect of ion irradiation on the structure of Au/Ni multilayers, 247
Surface morphology
growth, morphology and annealing of thin Co layers on Au/mica, 58
comparison of magnetism and morphology of ultrathin Fe films on Cu(100) and $Cu_3Au(100)$, 99
Surface structure
surface topography of amorphous $Zr_{65.0}Al_{7.5}Cu_{27.5}$ alloy films around the glass transition—an in-situ UHV-STM study, 240
surface structure characterization by photoelectron holography, 266

Tantalum
texture and phase transformation of sputter-deposited metastable Ta films and Ta/Cu multilayers, 203
Titanium
elaboration and characterization of Ti and TiN thin films and Ti/TiN multilayers for hard coating applications, 213
Titanium nitride
elaboration and characterization of Ti and TiN thin films and Ti/TiN multilayers for hard coating applications, 213

Transmission electron microscopy
giant magnetoresistance and microstructure in Cr–Fe and Cu–Co heterogeneous alloys, 106
Tungsten
profile analysis of thin film X-ray diffraction peaks, 40
optical and crystallographic properties of potassium-implanted tungsten, 140
influence of microstructure on residual stress in tungsten thin films analyzed by X-ray diffraction, 168

X-ray diffraction
study of the mechanical and microstructural state of platinum thin films, 22
residual stresses influence on the structural evolution of Cu–Mo solid solutions studied by X-ray diffraction, 25
profile analysis of thin film X-ray diffraction peaks, 40
metallic multilayers and hydrogen, 48
erbium silicide films on (100) silicon, grown in high vacuum. Fabrication and properties, 87
optical and crystallographic properties of potassium-implanted tungsten, 140
influence of microstructure on residual stress in tungsten thin films analyzed by X-ray diffraction, 168
X-ray diffraction study of the sub-structure modification induced by residual stresses during the deposition process of 304L stainless steel films, 188
X-ray scattering
Monte Carlo simulation of non-specular X-ray scattering profiles from multilayered structures, 184

Zirconium
thickness- and concentration-dependent crystal-to-amorphous transition of $Fe_{100-x}Zr_x$ in $Zr/Fe_{100-x}Zr_x/Zr$ trilayers, 176
